The 2005 range DVD Recorder products are repaired centrally.  
Defective sets must be identified, labelled and stored for pick-up.  
This document gives full instructions for a functional check.  
Technical information to repair faulty sets is therefore not provided in this document.

To test in-coming sets the following must be performed:

1. Verify / Reproduce the customer's problem
2. Verify that set has latest Firmware (see chapter 3) and upgrade if it is not the latest version.
3. Full functional check
